## Bandridge Blue Connectivity - a new approach

Bandridge: Europe's most creative and innovative brand in Consumer Electronics connectivity for more than seventeen years. In 1990, we launched the first generation of Bandridge connectivity blisters - a complete retail concept in connectivity to maximise sales and profitability. Our 'look and feel' packaging was a great success. Since then, this revolutionary range has gone from strength to strength with two further generations of the blister.

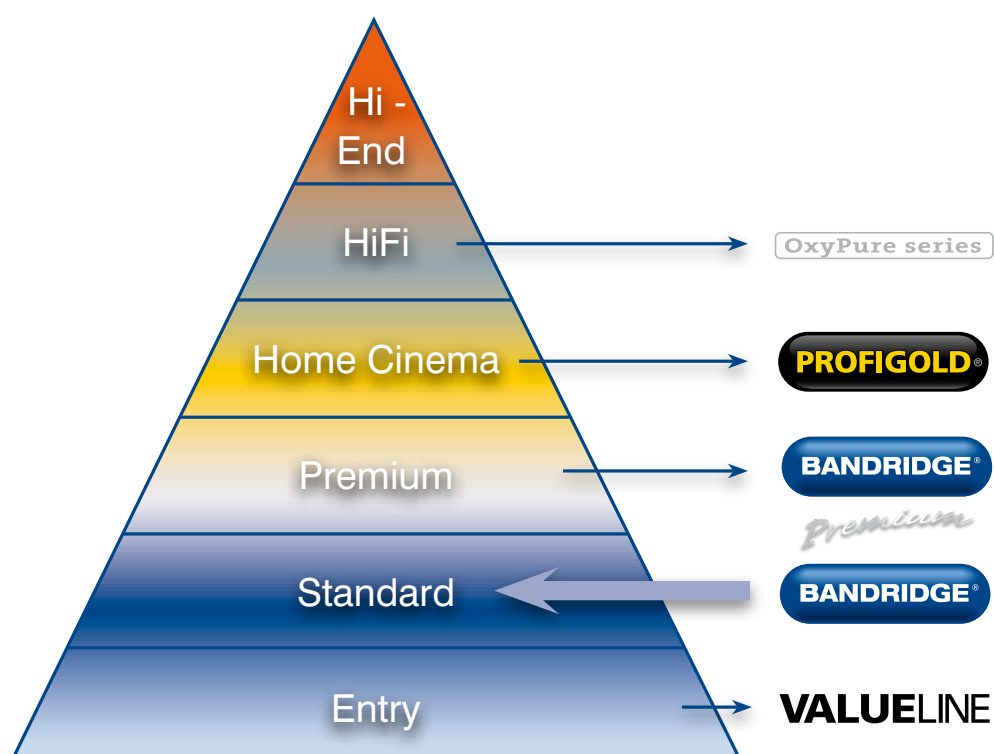

Today, Bandridge and its fellow brand Profigold are benchmark brands when it comes to Consumer Electronics connectivity, and they are distributed in over 65 countries around the world. To ensure sales continue to grow and expand beyond current borders, we present the third generation blister: Bandridge Blue Connectivity. A radical and forward-looking approach to connectivity, and a more intuitive approach to retailing.

## Brand Identity & Positioning

We have created a revolutionary and attractive retail concept that fits in well with our multi-brand position in the Consumer Electronics market. The new Bandridge range has been thoughtfully designed and developed in association with top Dutch designers; it is now the standard-bearer for brand identity in the mass-market.

Our unique branding philosophy allows one distributor to meet all the demands of its retail customer base. The new Bandridge Blue solution perfectly complements the Bandridge Premium range, which was launched in September 2006. It is positioned just below Bandridge Premium but perceptibly above Value Line.

Its strong brand identity represents Dynamics, Sympathy, Reliability, Transparency and Market Drive, and pushes up maximum sales and channel margins.

## Self-Select

Bandridge Blue is designed to complement the Bandridge Premium line without distracting from it. Its inspiring artwork is based on the strength and timeless presence of the most impressive animals on Earth. That's why Bandridge Blue instantly attracts the consumer.

1. Transparent window for instant connector identification
2. Fast and easy product group identification
3. Centralised embossed logo for strong brandawareness
4. Multi-lingual text for international consumers
5. Information icons for instant communication
6. Universal length indicators in metric and imperial
7. Support in 14 languages
8. ROHS compliant
9. User-friendly installation guide
10. Stand-alone or group display

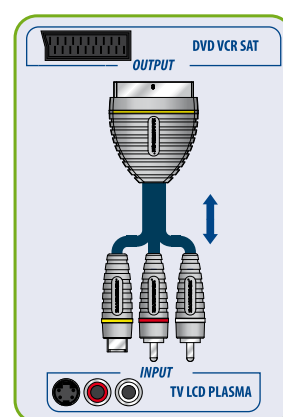

## Exclusive Moulded Plug Design

Our state-of-the-art design has resulted in a moulded plug that is simple to handle and gives accurate connection. The colourcoded rings make it easy to identify which plug goes into which socket. Green for headphones, yellow for video, etc.

## User-friendly Installation Guides

Our installation guides do not use jargon. We keep the descriptions comprehensive but simple, so that the average man in the street can connect our products first time - every time. For example, signal direction is conveyed by an arrow, and distinctive icons indicate products that are bi-directional.

## Connecting Our World

Bandridge is without doubt Europe's number one connectivity specialist. With our unique and highly specialised solutions, we've got the pre-packed cable market covered. No matter who your consumer is, we have the answer. Together, we can connect the world...

## Bandridge Campus

The Bandridge concept not only means making efficient use of your selling space. It also means maximising your profit per m<sup>2</sup>, allowing your customers to self-select, and providing effective merchandising techniques that boost sales. We want to give you the tools to put the theory into practice. The Bandridge Campus does just that.

The Bandridge Campus is a teaching institute for distributors and retailers. It provides theory, practical know-how, and everything else in between. By using live and on-line training techniques, you and your sales staff will learn everything you need to know about our products, cross-sales and merchandising. The result? Improved service. Increased sales. Satisfied customers.

## Bandridge and the environment

Bandridge is a proud supporter of the RoHS Directive, as well as several other environmental regulations. To be fully compliant with European RoHS regulations, we produce the Bandridge Blue blister in low cadmium resident PVC. That means it not only protects the product against dust and damage, it also helps protect the environment.

**ROHS  
COMPLIANT**

## Channel support

To support the launch of the new Bandridge range and to maximise sales, we have developed several marketing tools. They range from a full advertising campaign, extended web-support, p.o.s materials, display stands, catalogues and flyers to complete store (re)openings and in-store brand promotion items. And to assist the consumer in selecting the right cable, Touch Screen connection kiosks are now available. These not only generate additional sales, they also improve consumer satisfaction by ensuring the right choice and, consequently, the best possible product performance. They also eliminate products being returned because of incorrect selection.

## Smart Logistics

We have re-designed our cartons for fast, safe and error-free handling. Bandridge products are now packed in cartons that are based on ergonomic sizes and weights. Barcodes on the inner and outer cartons have been updated to meet the latest GS1 European standard, and non-reflecting labels are used to guarantee error-free scanning in warehouses and retail stores. All this means less handling and, of course, increased efficiency in purchasing and logistics.
